## DETAILED ACTION

### *Information Disclosure Statement*

1. The information disclosure statement filed 9/2/98 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 10-36 are rejected under the judicially created doctrine of double patenting over claims 1-9 of U. S. Patent No. 5,772,659 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 3736

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a constant power control circuit for an electrosurgical generator.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

5. Claims 29-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Lindenmeier et al. Lindenmeier et al. disclose a system for controlling the operation of a high frequency cutting device, comprising means for controlling the output voltage in response to the circuit impedance.
6. Claims 29-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Shipp.

Art Unit: 3736

Shipp discloses a power control for a electrocautery unit, comprising means for providing automatic feedback and control of the output power, in accordance with one of multiple power levels selected by the user.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,749,871 issued to Hood et al.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan Carter whose telephone number is (703) 308-2990.
